## The Heart Circle Process

\$22.00

The Heart Circle Network began with this book. While it's deeply inspiring, it's much more than that. It is a well-designed and practical portal for those wanting to further expand their awareness while creating community around them. It's also a timely book. It's main premise is that these are the times that we need to be gathering together in circle. Tej Steiner's step-by-step process for effectively doing this is catching people's attention all over the world.

This important and beautifully written book by Tej Steiner will provide you with a complete guide for establishing or strengthening your own "awakening" practice as well as for creating your own Heart Circle. It inspires, informs, and offers an answer to the question of how can you best respond these radically changing times.
